Adductor Stretch Standing

Stand with a wide stance, and lean towards one side creating a stretch on the inside of your leg. Hold the stretch for the required time, and relax. Be careful not to go too strong, the adductor muscles on the inside of your thigh can easily pull if you stretch too hard.

Repetitions 4 | Time 20 seconds

Video: <http://youtu.be/zic8EezO6pM>

adductor stretch in half-kneeling

Kneel on your left knee and place your right leg to the side as shown in the image. Make sure your right heel is in line with your L knee. Now lunge towards the right to stretch the inner thigh. Do not let your right knee fall forwards.

Repetitions 4 | Time 20 seconds

Gastrocnemius Stretch - Single Leg

Stand facing a wall, with your hands resting on the wall. Move one leg forwards and gently bend your knee, this will be the passive leg and just there for support. The leg you will be stretching will remain straight with your heel on the ground. You should feel a stretch to the leg at the back, in the calf muscle (known as the gastrocnemius).

Repetitions 4 | Time 20 seconds

Towel Calf Heel Raises for Plantar Fasciitis Both Legs

Roll a small towel and place it on the floor. Place your toes on top of the roll under both feet. Lift your heels from the floor. Return to the start position and repeat as required.

NOTE: only the right foot needs to be on the towel.

Repetitions 5 | Time 10 seconds

Video: <https://youtu.be/PkMHAzaipVg>

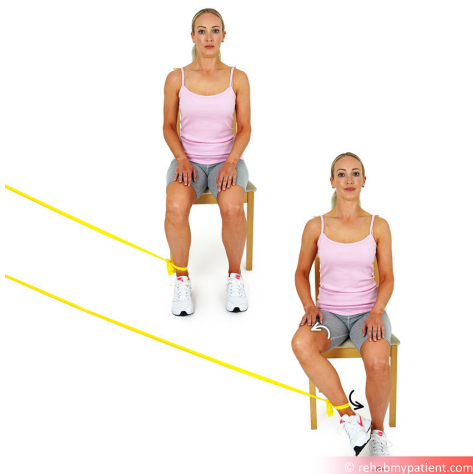

Hip Flexor Psoas Stretch 1

In a kneeling lunge position, move your back leg's foot slightly inwards (towards the opposite side) and then move your body forwards to create a stretch to the front of your thigh and groin.

Repetitions 4 | Time 20 seconds

Video: <http://youtu.be/sDn-UtqdX58>

Hip External Rotation Band Sitting - NO BAND

Pull your ankle inwards as your upper leg turns outwards. Repeat as required. This is a strengthening exercise for your hip.

Sets 4 | Repetitions 6

Video: <https://youtu.be/sT0gXVnj1xg>

Calf Heel Raise One Leg

Stand upright on one leg. Slowly raise up onto your toes, and control the movement back down. Hold on to a wall or table for support. This exercise will strengthen the calf muscle and ankle joint.

NOTE: keep your knee straight and your toes on the ground

Sets 4 | Repetitions 4

Video: <http://youtu.be/QEILlo9Kzlw>

Standing donkey kicks - NO BALL

NOTE do not use the ball

Stand upright with your hand on a handrail or wall for support. Bend the affected leg's knee to 90 degrees and then push your push backwards, causing extension at the hip. This is only a small movement and you should feel your glutes activating.

Sets 4 | Repetitions 6

Dear Lee

I changed the kneeling adductor stretch slightly. The image and description is in the programme.

I have also kept the calf raises to 4 reps at a time to help limit fatigue.

Good luck and keep with it!

Best Wishes
